

Corporate Profile

Executive Edition 1.0

MTG-DOC-0004

Engineering Africa's Future. Building Institutions That Endure.

Who We Are

Malak Technologies Group (MTG) is a technology engineering brand of Malak Trading CC, Namibia. MTG is being built as a long-term institution focused on enterprise software engineering, digital transformation, cloud-native platforms, artificial intelligence, research and knowledge sharing.

Our Purpose

To engineer technology that strengthens institutions, empowers people and creates lasting value across Africa and beyond.

Mission

To design, build and maintain secure, scalable and elegant digital platforms that help organisations operate with greater intelligence, efficiency and trust.

Vision

To become one of Africa's most respected technology engineering companies, recognised for dependable enterprise platforms, practical research and long-term partnerships.

Foundational Principles

Build for the long term Create assets that remain useful and can evolve through future releases.	Solve real business problems Begin with a clearly understood organisational need and measurable outcome.
Create reusable assets Build frameworks, components and methodologies that compound in value.	Share knowledge responsibly Publish where it benefits clients and society while protecting proprietary IP.
Pursue excellence with integrity Earn trust through quality, honesty and professional stewardship.	Strengthen institutions Leave clients, products and teams more capable than before.

Enterprise Capabilities

Enterprise Software Engineering Custom digital platforms, portals and business systems designed for maintainability and growth.	Digital Transformation Advisory Strategy, operating-model alignment and technology roadmaps connected to business outcomes.
Cloud Engineering Cloud-native architecture, deployment automation, infrastructure and modern application delivery.	Artificial Intelligence Solutions Responsible automation, knowledge systems and decision-support capabilities.
Cybersecurity Consulting Security architecture, governance, risk awareness and controls embedded by design.	Systems Integration APIs, workflow integration and connected enterprise experiences across platforms.

Priority Industries

- Government and public sector
- Financial services
- Mining and resources
- Healthcare
- Education
- Transport and logistics
- Tourism and hospitality
- Property and construction

Product Direction

MTG One provides the shared design and engineering foundation for the company's future platforms. MTG Fleet is the first flagship product direction, followed by planned CRM, ERP and AI-enabled enterprise capabilities.

How We Work

- 01 Discover** Clarify the business goal, users, constraints and measures of success.
- 02 Design** Define the recommended solution, experience, architecture and delivery approach.
- 03 Build** Engineer, test and document the platform in verifiable releases.
- 04 Deploy** Launch, support adoption and establish a sustainable operating model.
- 05 Improve** Measure outcomes, learn and continuously strengthen the solution.

Leadership

Timothy Chikobwe is the Founder and Chief Executive Officer of Malak Technologies Group. His role is to define the long-term direction of the institution, build strategic partnerships and ensure that MTG grows through disciplined engineering, integrity and stewardship.
